(20) Silverado stud poker;
The play -- Three-card poker. Three-card poker must be played according to the following rules:
(1) Three-card poker may be played only on tables designated by the licensee for the play of three-card poker. A single deck of cards must be used. At the operator’s discretion, each player may play up to two hands following each shuffle of the deck. The rank of hands in three-card poker, from highest to lowest is straight flush, three of a kind, straight, flush, pair, and high card;

(2) Each player must make at least one initial bet in the amount specified at the table by the retail licensee and must place the bet or bets in either one, or both, of the pair plus or the ante wagering areas in front of the player’s position. The optional progressive bet is made on the sensor in front of the player’s position. The pair plus and optional progressive bets are placed to play for hand value only; the ante bet is placed to play against the dealer; both bets may be placed if the player wishes to play both ways. There is also an optional six card bonus wager that may be wagered to play against a paytable for the best five card hand that may be made using the player’s three card hand and the dealer’s three card hand. To make the six card bonus wager, players must place a bet in the betting area marked as “six card bonus”;

(3) Any dealer tip delivered as a wager may be placed on either one, or both, of the pair plus or ante hands, provided that the player has placed a personal wager on the same hand. If a player continues play with a play wager, the dealer’s tip ante may remain in play whether or not the player adds a play wager for the dealer;

(4) Immediately before play begins and after each round of play has been completed, the dealer must shuffle the cards. After each player places his or her bets, the dealer shall press the appropriate button on the keypad. The sensors must lock in the bet and light up, indicating a progressive wager. The dealer shall remove all progressive bets from the table. Following
shuffle and cut, the dealer deals three cards to each player and to the dealer, either face downward and one at a time in rotation among the players and the dealer or in a three-card group dispensed by a mechanical shuffling device. The first player to receive a card or cards is the player to the left of the dealer; the dealer receives cards last;

(5) An incorrect number of cards dealt to a player or to the dealer is always a misdeal. An exposed card is not a misdeal. If the dealer exposes a card, the dealer turns the card over and continues dealing;

(6) Wagers are collected or paid in this order: play, ante bonus (if applicable), ante, pair plus, and six card bonus. The optional progressive wager must be collected prior to cards being dealt. The sensor must stay lighted during the round of play if a progressive wager was made and winning hands must be paid at the completion of the round of play;

(7) For the dealer’s hand to qualify to play against the players’ hands, the dealer’s hand must have a value of queen high or better. If the dealer’s hand does not qualify to play, all ante bets are won by the players and paid at the rate of 1 to 1. If the dealer’s hand does not qualify to play, all play bets are pushes and bets are neither collected nor paid;

(8) If a player has placed an ante wager and does not wish to play, the player may fold and forfeit the ante bet. If a player folds and has made a six card bonus wager, the six card bonus wager remains in play and resolved at the end. If a player who has placed a pair plus wager does not receive at least a pair, the wager is lost and the player must fold the player’s cards. After all players who wish to fold have folded, the dealer collects the ante or the pair plus wagers, or both, and the cards from each player who folded. All bets must be collected in the order in which the players fold. As the dealer collects the cards, the cards are spread face down
to count the cards and then placed in the discard rack. A player may ask to view the folded hands;

(9) If a player who has placed an ante wager wishes to stay in the hand, the player must place an additional wager in an amount equal to the ante in the play wagering area in front of the player’s position and must place the player’s hand under the wager in the play area;

(10) After all players have acted, the dealer exposes the dealer’s cards and creates the best possible three-card poker hand, ranking the cards from the dealer’s left to the right and allowing the players to see the hand the dealer then takes either of the following actions:

(a) If the dealer does not have a qualifying hand, there is no action on the play bets; the ante bonuses are paid on all straights or better; all ante bets are paid; all pair plus wagers are paid or taken; and all six card bonus wagers are paid or taken; or

(b) If the dealer has a qualifying hand, the play wagers are paid or taken; the ante bonuses are paid on all straights or better; the ante is paid or taken; the pair plus wagers are paid or taken; and all six card bonus wagers are paid or taken;

(11) If, after ranking the cards, the dealer finds that the dealer's first two cards are a tie with a player's, the third card determines the winner. A tied hand is a push on the play and on the ante; however, the bonuses on the ante and the pair plus wagers are always paid if applicable;

(12) If a player beats the dealer’s qualifying hand, the player wins the player’s ante and play bets, both of which are paid at the rate of 1 to 1. If the dealer’s hand has a higher poker rank than the player’s hand, the player loses both the player’s ante and play bets. Tied hands are pushes;
(13) The following hands are always paid a bonus on the ante as the bonus does not play against the dealer:

(a) Straight flush pays 5 to 1;
(b) Three of a kind pays 4 to 1; and
(c) Straight pays 1 to 1 (even money);

(14) If a player has bet on pair plus and the player’s hand contains a pair or better, the player wins, regardless of the dealer’s hand. If the player’s hand contains less than a pair, the player loses. The player is paid according to the following payment schedule, which must be included as part of the table layout:

(a) Straight flush pays 40 to 1;
(b) Three of a kind pays 30 to 1;
(c) Straight pays 6 to 1;
(d) Flush pays 4 to 1; and
(e) Pair pays 1 to 1 (even money);

The original progressive wager is not returned to the player. The initial meter seeding shall be $1,000 and the meter shall be reseeded at $1,000 each time after the top prize hits.

(a) A progressive wager shall be paid to the player as follows:

(i) The percentage pays are paid from the progressive jackpot shown on the progressive meter;

(ii) Other hands are paid from the tray; the payment does not come off the meter;

(iii) If a player has a progressive winner, the dealer shall press the appropriate button on the keypad and contact a supervisor. If the button is pressed by accident, pressing it again shall turn the button off;
(iv) If more than one progressive hand payable from the progressive meter hits at the same table during the same time, house procedures are then followed for paying the prize;

(v) After keying in the progressive winner, the meter may be reduced, depending on the winning hand. Keying in a 100% award will reset the meter to the seed amount, plus any reserve amount. The dealer will continue handling progressive awards in a counter-clockwise fashion; and

(vi) When the dealer reconciles all action, the dealer presses the appropriate button on the keypad. This resets the system to begin the next hand and be logged into the progressive system.

(b) A player making the progressive side wager on the envy bonus qualifies to win an envy payout. If any other player at the table made the progressive side bet and hits a hand associated with an envy pay, the player wins the envy pay. The player hitting the hand receives the normal prize pay only, but does not receive the envy pay. Rule of thumb: You cannot win an envy bonus pay from yourself or the dealer. If a player’s hand triggers an envy payout, the dealer shall leave the hand face-up on the layout; otherwise, the dealer shall lock up the cards. The dealer shall then move on to the next player.

The dealer pays any envy bonus at the end of the round. If more than one player is involved in a qualifying envy pay, each qualifying player wins multiple envy payouts; and

20:18:16:15.15. The play -- Ultimate Texas Hold'em. Ultimate Texas Hold'em must be played according to the following rules:

(1) Ultimate Texas Hold'em may be played only on tables designated by the licensee for the play of Ultimate Texas Hold'em. A single deck of cards must be used. Posted table limits must take into consideration the additional wagers available so that a customer cannot exceed the $1,000 bet limit. The rank of hands in Ultimate Texas Hold'em, from highest to lowest, is royal flush, straight flush, four of a kind, full house, flush, straight, three of a kind, two pair, pair, and high card;

(2) Each player shall make at least one initial bet in the amount specified at the table by the retail licensee and shall place the bet in either the Trips wagering area or both the ante and blind wagering areas, not to exceed the posted table limits, in front of the player’s position. The optional progressive bet is made on the sensor in front of the player’s position. The trips wager and progressive wager are placed to play for hand value only; the ante bet is placed to play
against the dealer; and the blind bet is placed to play for hand value and against the dealer. All bets may be placed if the player wants to play all ways;

(3) Any dealer tip delivered as a wager may be placed on any one, or all, of the trips, ante, or blind bets, if the player has placed a personal wager on the same hand. If a player continues play with a play wager, the dealer’s tip ante may remain in play whether or not the player adds a play wager for the dealer;

(4) Immediately before play begins and after each round of play has been completed, the dealer shall shuffle the cards. After all players have placed wagers, the dealer shall press the appropriate button on the keyboard. The sensors shall lock in the bet and light up, indicating a progressive wager. The dealer shall remove all progressive bets from the table. Following shuffle and cut, the dealer deals two cards to each player and to the dealer, face downward and one at a time in rotation among the players and the dealer. The first player to receive a card is the player to the left of the dealer; the dealer receives cards last or if a mechanical shuffling device is used, the five community cards are dispensed first, then two-card groups must be dispensed for every player, and the dealer is last;

(5) An incorrect number of cards dealt to a player or to the dealer is always a misdeal. An exposed card is not a misdeal. If the dealer exposes a card, the dealer turns the card over and continues dealing;

(6) Wagers are collected or paid in this order: play, ante, blind, and trips, if applicable. The optional progressive wager shall be collected before cards are dealt. The sensor shall stay lit during the round of play if a progressive wager was made and winning hands shall be paid at the completion of the round of play;
(7) Once a player looks at the two face down cards, the player has the option to check to see the flop, the first three community cards, or bet. If a player makes a bet, that player shall place an additional wager in an amount equal to 3x or 4x the ante in the play wagering area in front of the player’s position and place the cards face down under the play wager in accordance with house policy. Once a player makes a play bet, the player is locked into the hand and must wait to see if the player beats the dealer’s hand to be paid;

(8) After all players have acted, the dealer burns a card and exposes the flop, which is the first three community cards;

(9) The players who checked during the first round of betting shall be given the option to check again to see the next two community cards or bet. If a player makes a bet, that player shall place an additional wager in an amount equal to 2x the ante in the play wagering area in front of the player’s position and place the cards face down under the play wager. Once a player makes a play bet, the player is locked into the hand and must wait to see if the player beats the dealer’s hand to be paid;

(10) After all players have acted, the dealer burns a card and exposes the turn and river cards, which are the final two community cards;

(11) The players who checked during the second round of betting shall be given the final option to bet or fold. If a player makes a bet, that player shall place an additional wager in an amount equal to the ante in the play wagering area in front of the player’s position and place the cards face down under the play wager. Once a player makes a play bet, the player is locked into the hand and must wait to see if the player beats the dealer’s hand to be paid;
(12) If a player has placed an ante, blind, or trips bet and does not wish to play, the player may fold and forfeit the ante, blind, and trips bet or bets after the turn and river. If a player already has at least a three of a kind or better the player shall be paid on the trips wager. After each player who wishes to fold has folded, the dealer collects the ante, blind, and trips bet or bets, if not a three of a kind or better, and the cards from each player who folded. As the dealer collects the folded cards, the cards are spread face down to count the cards and then placed in the discard rack;

(13) After each player has decided to play or fold, the dealer shall expose the dealer’s two down cards and combine the cards with the five community cards and call out and show the best possible five-card hand that the players have to beat. Once the dealer has determined what the highest hand is, the dealer takes either of the following actions:

(a) If the dealer does not have a qualifying hand, a pair or better, there is no action on the ante bets and the ante bets are returned to each remaining player; all remaining bets remain in action and shall be pushed, paid, or taken accordingly; or

(b) If the dealer has a qualifying hand, the play and ante wagers are pushed, paid, or taken; the blind bet is either pushed, paid on all straights or higher if the player beats the dealer, or taken; the trips bet is paid on all three of a kind or better, or taken;

(14) If the dealer’s hand is a tie with a player’s hand, the play, ante, and blind bets are a push; however, the trips wager is paid, if applicable;

(15) For play and ante bets, if a player’s hand beats the dealer’s hand, the player wins the ante and play bets, both of which are paid at the rate of 1 to 1. If the dealer’s hand has the
higher poker rank than the player's hand, the player loses both the ante and play bets. Tied hands are a push;

(16) For blind bets, if the dealer’s hand beats the player's hand, the blind bet loses. If a player’s hand beats the dealer's hand and the player’s hand contains a straight or better the player wins the blind bet. The player is paid according to the following blind payment schedule, which must be included as part of the table layout:

The original progressive wager may not be returned to the player. The envy and seed amounts adjust up or down accordingly with changes made to the wager amount:

(a) For progressive winners:

i. The percentage pays are paid from the progressive jackpot shown on the progressive meter;

ii. Other hands are paid from the tray; these payments do not come off the meter;

iii. If a player has a progressive winner, the dealer shall press the appropriate button on the keypad. If the button is pressed by accident, the dealer shall press the button again to turn it off;

v. If more than one progressive hand payable from the progressive meter hits at the same table during the same time, house procedures are followed for paying the prize;

vi. After keying in the progressive winner, the meter may be reduced, depending on the winning hand. Keying in a 100% award will reset the meter to the seed amount, plus any reserve amount. The dealer shall continue handling progressive awards in a counter-clockwise fashion;

vii. After the dealer reconciles all action, the dealer shall press the appropriate button on the keypad. This action shall reset the system to begin the next hand and be logged into the progressive system;

(b) An envy bonus shall be paid as follows:

i. A player making the progressive side wager also qualifies to win an envy payout. If another player at the table has a royal or straight flush, each player who made the progressive side bet wins the envy payout. A player that has a royal or straight flush and has not made the progressive side bet only receives the normal prize pay and does not receive any envy pay;

ii. If a player’s hand triggers an envy payout, the dealer shall leave that player’s hand face-up on the table until all payments are made; and

iii. The dealer shall pay any envy payout at the end of the round. If more than one player is involved in a qualifying envy payout, each player wins multiple envy payouts;

20:18:33:12 Variation of the Play – Bonus Craps

20:18:33:13. Variation of the play - Sharp Shooter. Sharp Shooter is a variation of craps. This game offers an optional wager that may be made before the “come out” roll of a new shooter. Sharp Shooter may be played on an existing craps table. None of the existing features of the craps table may be eliminated. After a point is established by a new shooter - 4, 5, 6, 7, 8, 9, or 10 - then no more Sharp Shooter wagers may be accepted. After a Sharp Shooter wager is made, the wager may not be taken down or called off after a new shooter established the initial point. A Sharp Shooter wager shall be paid according to the number of consecutive successful points made before the dice seven-out.

Any player making a Sharp Shooter wager must place the player’s wager on the appropriate Sharp Shooter area on the layout directly below the player's gaming position. After a Sharp Shooter wager is made, the base dealer shall be instructed by the box person to bring the bets in. If the wager is more than one cheque high, the base dealer shall then splash the Sharp
Shooter wager to confirm the exact amount of the wager. After all bets have been proved, the bets should be brought up and placed on the corresponding numerical betting circles located in front of the box person at the top of the layout. Sharp Shooter wagers must remain in these numeric betting circles until the bet is either lost or paid. Additional requirements include:

(1) Players may only make a Sharp Shooter wager prior to a point being established by a new shooter;

(2) Sharp Shooter limits and payouts shall be posted at each table;

(3) The Sharp Shooter wager may not be called off or taken down once a new shooter has established the initial point;

(4) The Sharp Shooter wager is paid according to the number of consecutive points the shooter successfully makes before the dice seven-out;

(5) Points do not have to be in any specific order;

(6) Winning or losing in the come out roll will not affect this bonus wager. Only the seven out may terminate the bet;

(7) The stickman or boxman shall use a lammer to keep track of the number of passes; and

(8) Players win if the shooter makes at least three points before a seven out. The more consecutive points the shooter makes, the higher the payouts. If a shooter makes 10 points, the Sharp Shooter bet pays the top award and the sequence ends.

Any dealer tip delivered as a Sharp Shooter wager is placed at the top of the Sharp Shooter numbering area or piggy-backed (dealer bet sits on top of the player's bet slightly pushed forward) on top of the player's Sharp Shooter numbering spot wager.
A Sharp Shooter wager is paid in accordance with one of the following paytables:
