

Tax Increment Financing Annual Report

2025

Introduction

What is a TIF?

Tax Increment Financing, or TIF, is a means of financing public improvements in a defined geographic area, known as a tax increment financing district, or TIF district. In South Dakota, a TIF district can be created by either a municipality or county.

TIF has been authorized in South Dakota since 1978. Over the last 45 years, TIF has become an increasingly popular tool for communities looking to upgrade existing infrastructure or as a means to provide an incentive for new investments in infrastructure for economic development.

This annual report details project descriptions, valuation information, and timelines for each TIF district.

Section 1: TIF Classification

As of July 1, 2018, South Dakota state law authorizes four classifications for TIF districts: Local, Industrial, Economic Development, and Affordable Housing. TIF district classification is a function of the state-aid to education formula and determines how a given TIF district impacts school funding in South Dakota.

Local

Local classification is the default classification. Unless the TIF district meets the definition of an Industrial, Economic Development, or Affordable Housing TIF district, it is a Local TIF district.

- The projects usually benefit the local government instead of having a regional or statewide benefit.

Example Projects

- Public infrastructure improvements

Impact on State-Aid to Education Formula

- Included in local effort
- The county auditor is required to impose an additional school levy on all real property within any impacted school district to hold the district(s) harmless.

Section 1 TIF Classifications (Continued)

Industrial

Industrial classification includes an area where activities are recognized as industrial by zoning authorities. ([SDCL 13-13-10.2](#))

- Including any factory or business whose primary business is the manufacturing or assembly of goods, the processing of raw materials, and the wholesale of products for resale.

Example Projects

- Animal processing plant
- Ethanol plant

Impact on State-Aid to Education Formula

- Not included as local effort in the state aid calculation
- Exempt from imposing an additional school levy on all real property within the district ([SDCL 10-12-44\(1\)](#))

Economic Development

Economic development classification includes any area where there is or will be one or more businesses engaged in any activity defined as commercial or industrial by the governing body that has zoning authority over the land contained within the TIF district. ([SDCL 13-13-10.2](#))

Example Projects

- Public infrastructure improvements for commercial or retail development

Impact on State-Aid to Education Formula

- Not included as local effort in the state aid calculation
- Exempt from imposing an additional school levy on all real property within the district ([SDCL 10-12-44\(1\)](#))

Affordable Housing

Affordable Housing classification includes an area where:

1. The original selling price of any house in the district will be at or below the first-time home buyer purchase price limit being used by the South Dakota Housing Development Authority as of the date the house is sold; OR
2. The monthly rental rate of all multifamily housing units in the district will be at or below the calculated rent for the state's eighty percent area median income as of the date the district is created, for a minimum of five years following the date of first occupancy.

For more information on the Affordable Housing criteria, call the South Dakota Housing Development Authority at 605-773-3181.

Section 1 TIF Classifications (Continued)

Affordable Housing (Continued)

Example Projects

- Housing development infrastructure improvements
- Housing development
- Workforce housing

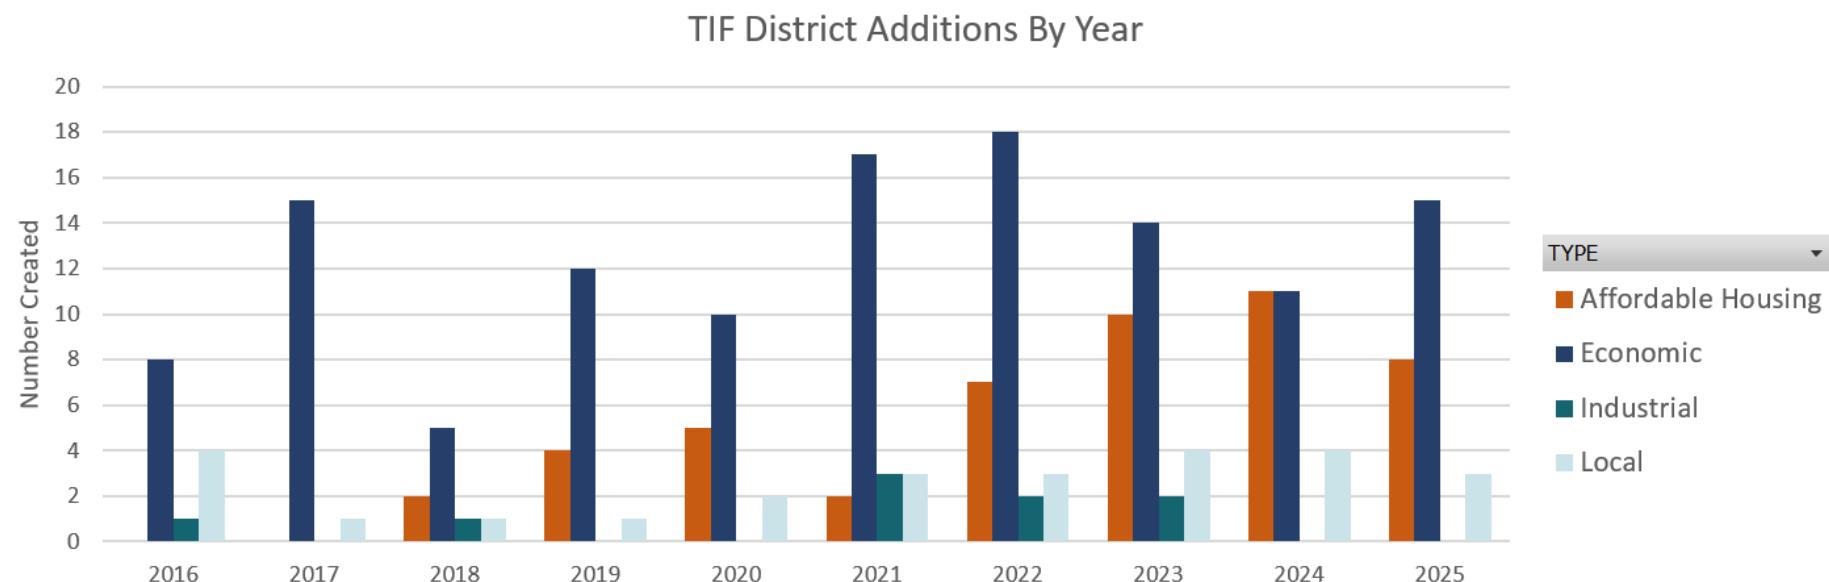

Impact on State-Aid to Education Formula

- Not included as local effort in the state aid calculation
- Exempt from imposing an additional school levy on all real property within the district ([SDCL 10-12-44\(1\)](#))

Section 2: TIF District Summary

Since TIF was first authorized in 1978, there have been a total of 516 TIF districts created in South Dakota. There are currently 277 active TIF districts.

The chart below shows the number and type of TIF districts created by year since 2016:

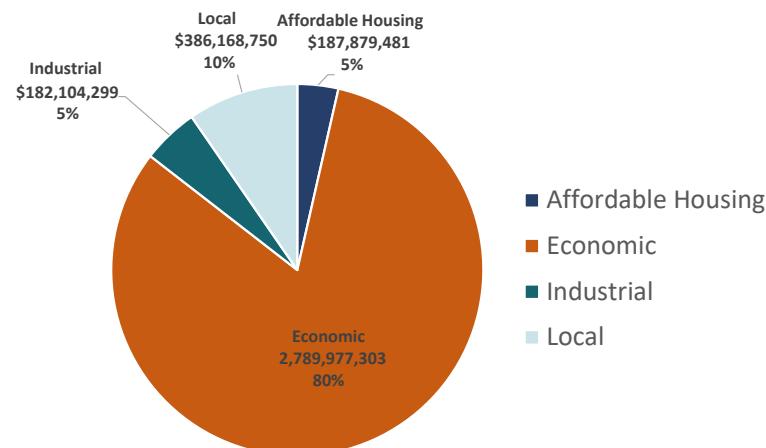

Section 2: TIF District Summary (Continued)

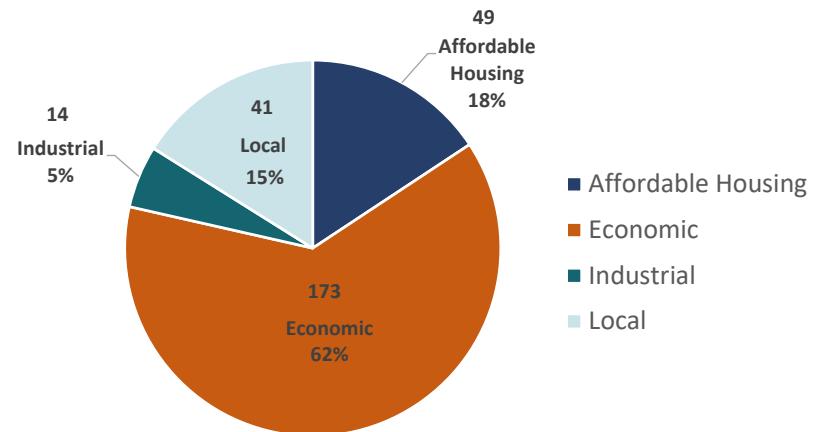

As explained in Section 1, the type of TIF district determines how the "increment value" is treated in the state-aid to education formula.

The following chart shows how much increment value exists by type of TIF district for the 2025 assessment year (taxes payable in 2026):

Assessed Value by Type

Active TIFs by Classification

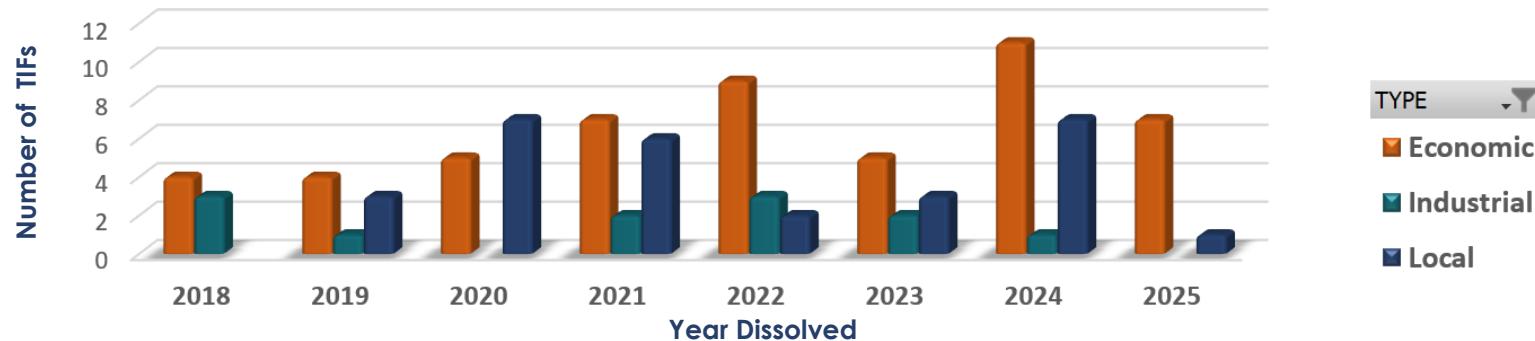

Section 3: Dissolved TIFs

A dissolved TIF is defined as a Tax Increment Finance District that has reached the maturity of 20 years since the inception or the reimbursement of approved project costs has been completed before maturity.

By the end of 2025, a total of 15 districts had been dissolved: 3 in Lawrence; 2 each in Custer, Minnehaha, Brown, and Davison; and 1 each in Clark, Clay, Lake, and Meade.

Since 2018, the number of dissolved TIFs has been between 8-16 districts annually. The rate of annual TIF dissolution is projected to remain the same for the next several years.

Dissolved TIFs by Classification

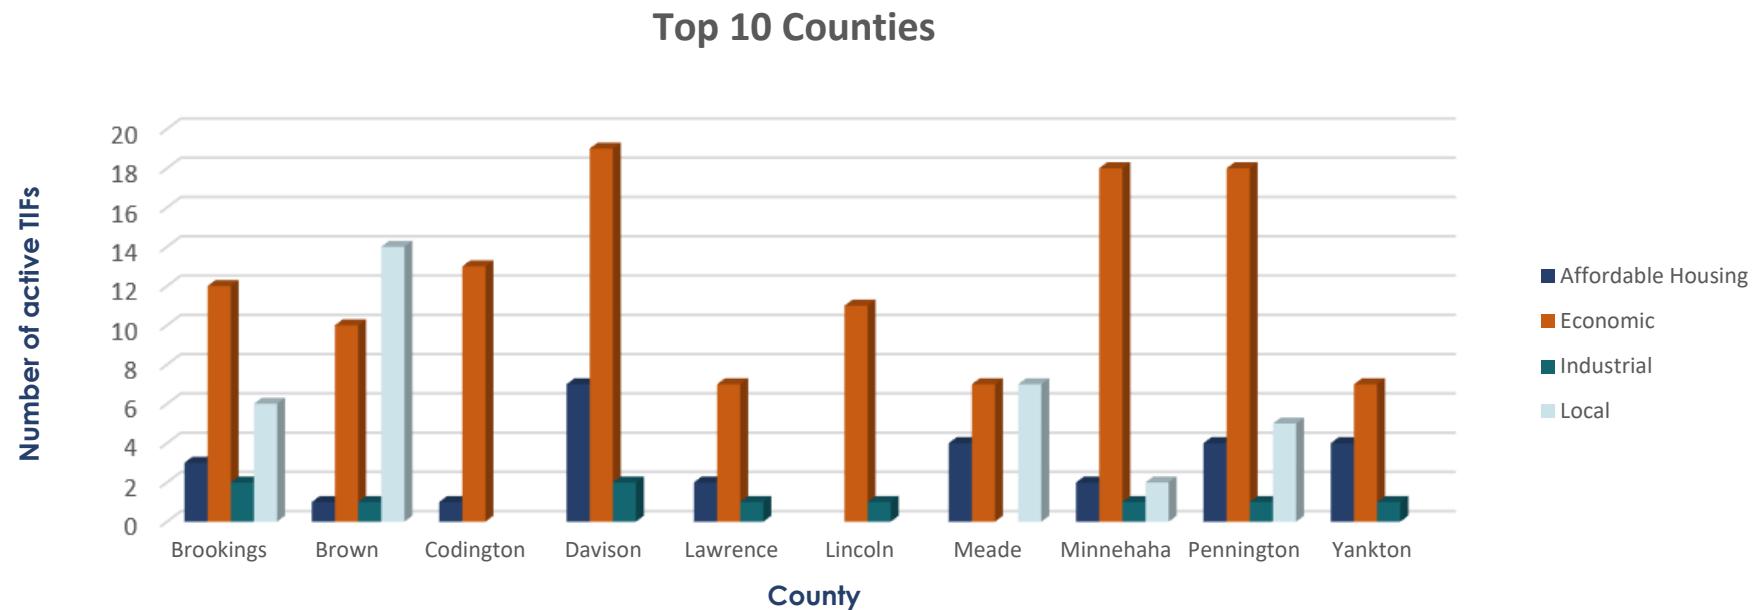

Section 4: Active TIF Districts

This section provides a breakdown of each active TIF throughout South Dakota as well as background information for each TIF.

This section is organized by the TIF's governing body and provides content such as creation dates, estimated jobs created and the anticipated project cost. Each individual TIF listing also includes a brief project description, school district, and contact information for the governing body.

The following table represents the top 10 counties with the greatest number of active TIF districts.
